

English to Brazilian Portuguese Localization QA Sample

Self-initiated portfolio case study for translation, localization QA, and AI/software content review.

Project Summary

Language pair: English to Brazilian Portuguese

Content type: SaaS app copy, onboarding text, UI strings, and help-center copy

Sample status: portfolio demonstration, not client work

English Source Sample

Stay focused without losing track of the details. TaskPilot AI captures your notes, highlights decisions, and suggests action items so your team can move faster after every meeting.

Review the suggested action items before sharing them. You stay in control of what gets sent.

Brazilian Portuguese Translation

Mantenha o foco sem perder os detalhes importantes. O TaskPilot AI captura suas anotações, destaca decisões e sugere itens de ação para que sua equipe avance com mais rapidez depois de cada reunião.

Revise os itens de ação sugeridos antes de compartilhá-los. Você mantém o controle sobre o que será enviado.

UI String Samples

New summary -> Novo resumo

Upload transcript -> Enviar transcrição

Generate action items -> Gerar itens de ação

Assign owner -> Atribuir responsável

Review before sending -> Revisar antes de enviar

Terminology Decisions

action items -> itens de ação: common in business/productivity contexts.

owners -> responsáveis: natural task-management wording; avoids literal 'donos'.

follow-up messages -> mensagens de acompanhamento: preserves meaning without unnecessary English borrowing.

Settings -> Configurações: standard software UI term.

workspace -> espaço de trabalho: common SaaS localization term.

Quality Checks

- Meaning preserved from source to target.
- Brazilian Portuguese reads naturally, not literally translated.
- Product name remains unchanged.
- UI strings are concise enough for buttons and menus.
- Terminology is consistent across app-store copy, onboarding, UI, and help center text.
- Safety/help-center warning remains clear and direct.
